I'm Ajay, a dedicated and innovative Frontend Engineer | Frontend Developer | UI Engineer with a strong foundation in building dynamic, scalable and responsive web applications. I specialize in leveraging cutting-edge technologies to create seamless user experiences.

EXPERIENCE

Frontend Engineer   **Oct 2023 - Present**
NextGrowth Labs Pvt Ltd   **Bangalore, IN**

• Building AppVector – A B2B SAAS Aso intelligence
• Tech stacks: React.JS, Redux, React Query, Typescript, Javascript, Next Js, storybook
• Collaborate with product managers, designers, and backend engineers to understand product requirements, user needs, and technical constraints.
• Design and develop user interfaces for web applications using HTML, CSS, and JavaScript libraries and frameworks (such as React Js, Next Js) while ensuring cross-browser compatibility and responsiveness.
• Create reusable and scalable front-end components that can be leveraged across multiple projects and applications.
• Optimize application performance and ensure smooth user experience by implementing efficient coding practices, performance optimizations, and caching strategies.
• Conduct thorough testing and debugging to identify and fix frontend defects, ensuring product quality and stability.
• Stay up-to-date with the latest front-end development trends, tools, and best practices, actively contributing to the adoption of new technologies and methodologies.
• Collaborate with the UX/UI design team to translate design concepts into interactive and visually appealing user interfaces.
• Work closely with backend engineers to integrate front-end components with backend APIs, ensuring seamless data flow and functionality.
• Contribute to the overall software development lifecycle, including requirements gathering, estimation, documentation, and deployment.
• Participate in the Agile development process, contributing to sprint planning, stand-ups, and iterative development cycles.
• Participating in code reviews and team meetings to enhance project quality.
